

(Delta) Yu Yan
Food Storage Project

Background: Food does not simply solve our biological need, but create internal bindings within different cultural contexts. During the stay-at-(not my) home period, I want to document and categorize my food consumption and storage as a “safety reference” for my family members who are away from me and care about me. And my mom will be invited to rate and comment on my daily food consumption based on the record.

Available Data: 4.1 - 4.14

Audience: People who experience the difficult time of COVID-19 and are away from family members, or anyone who loves food.

4/1

What I have in my fridge

Egg : 16

Banan : 5

Kiwi : 15

Cabbage : 2

Apple : 29

70

This is a 15-day record of my food consumption and storage during the stay-at-(not)my-home period in April 2020. My mom in China was invited to rate and comment on my daily healthiness based on this record. Move your mouse to explore food in my quarantine life.

Score

70

You did not eat anything for breakfast? I remember you must have a banana every morning.
